Reduce Intake Bottlenecks with Automated Workflows

Manage high referral volumes without increasing staff by reducing referral leakage with faster, more coordinated intake workflows.

Build Trust & Confidence

Welcome new patients with secure, mobile-first communication and automated intake

Reduce Intake Workload

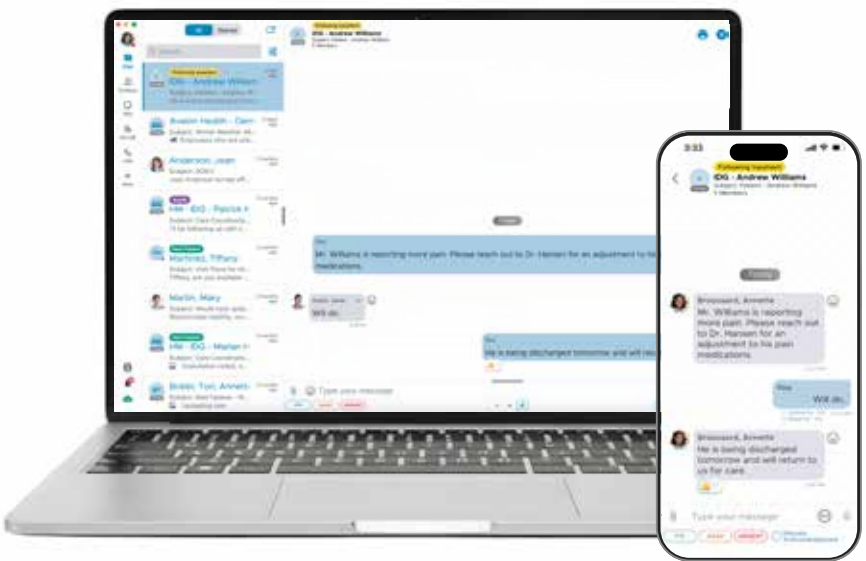

Digital pre-admission questionnaires that reduce manual data entry and intake calls

Convert Referrals Faster

Patient-level tagging that flags higher-risk new patients for faster follow-up

From nurses and aides to social workers, spiritual counselors, volunteers, and medical directors, QliqSOFT enables secure messaging that replaces personal phone use while keeping patient information protected.

Preventing No Shows With Visit Reminders

Support clinicians and patient satisfaction with secure, mobile-first communication about upcoming visits.

Visit Reminders

Avoid no-shows with automated patient reminders and visit confirmations

Visit Preparation

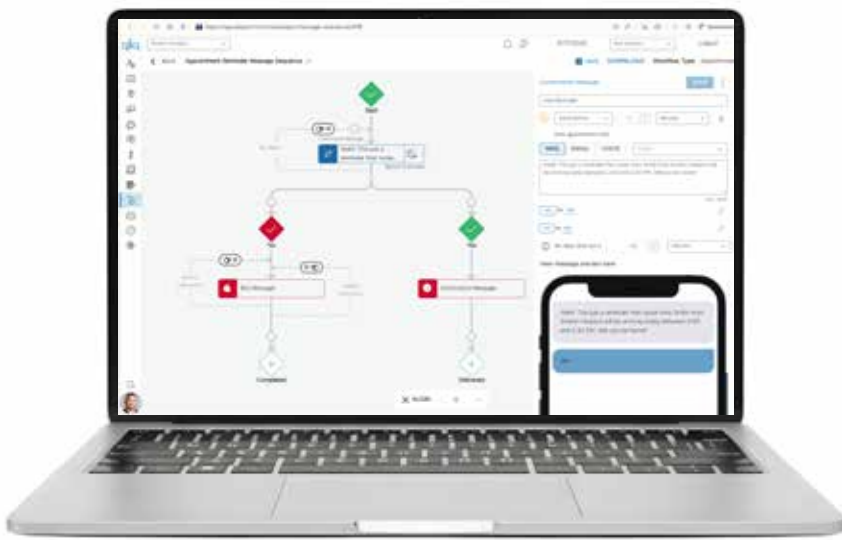

Optimize the visit by providing guidance on how the patient should prepare.

Build Trust & Confidence

Share images of staff to build patient trust. Easily communicate updates to visit timing.

Quick Start Content and robust no-code design enable you to go live in a week and see results within the first month.

Compassionate Bereavement Support, Delivered Automatically

When families are grieving, they deserve presence and follow-through, not silence. This program helps your team stay connected through thoughtful touchpoints and check-ins, with a clear path to human support.

How Automated Bereavement Workflows Work
